MAILPARCELS.COM

Mailparcels.com [**MPC**] provides a secure 'cloud-based' multi-platform mail management system for both end users and mail operators. It converts incoming mail and parcels into instant digital images with built-in smart alert system. Users can view and manage their mail items on their desktop or mobile devices and instruct mail operator on follow-up actions as required. The hybrid platform is user friendly, efficient and very reliable.

With customized pricing options for individual mail operator, it enables 'virtual address" providers to offer professional online mail management solutions along with other office services such as re-forward, trash-mail, cheque deposits and re-packing of parcels. Leasing of physical mailboxes to users and co-working office concept are also possible.

BENEFITS

- ❖ Easy to use 'web-based' platform
- ❖ Automated mail-alert system
- ❖ Built-in billing & user transactions
- ❖ No hardware or software investment
- ❖ No operating capital with low overhead
- ❖ No worries about website/system setup
- ❖ No credit risk or customer bad debt
- ❖ No prior business knowledge required
- ❖ Operator decides on pricing terms
- ❖ Ability to add multiple outlets/branches
- ❖ Opportunity to expand office services
- ❖ Local & international customer base
- ❖ High user renewal rates (above ~75%)
- ❖ Personalized training & guidance
- ❖ No revenue share. Low flat-rate model.
